

Jefferson Electric Offers Protective Feature: Rodent Screens

Jefferson Electric offers extra protection from unwanted entry of birds and rodents with rodent screens. As seen in the example below, this add-on feature is included on the front, back and bottom of ventilated units.

Rodent screens can be installed at the factory on custom ventilated units in kVA sizes 15 to 500kVA. For field installation of rodent screens, kits are also available for ventilated units.

Part numbers for field installation kits are:		
Kit #	kVA*	Width
4PT-7006-JXV	15	19in
4PT-7007-JXV	30	22in
4PT-7003-JXV	45	25in
4PT-7002-JXV	75	27in
4PT-7008-JXV	112.5	29in
4PT-7001-JXV	150	33in
4PT-7004-JXV	225	35in
4PT-7009-JXV	300	35in
4PT-7005-JXV	500	48in

*Typical KVA for 150° rise Transformer. May differ for K-factor units

Note: When ordering a custom unit with rodent shield, rodent shield will be installed at the factory. When ordering a field installation kit as a separate line item, you will receive kit including nuts and bolts for installation.

For more information on Jefferson Electric's rodent screens, please contact your local sales rep or call us directly at (800) 892-3755.
