

May 29, 2017

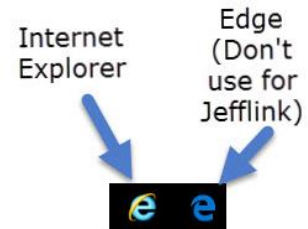

To our JeffLINC users:

### The JeffLINC portal has been updated!

We have made logging in to the system easier, with no worries about JAVA security.

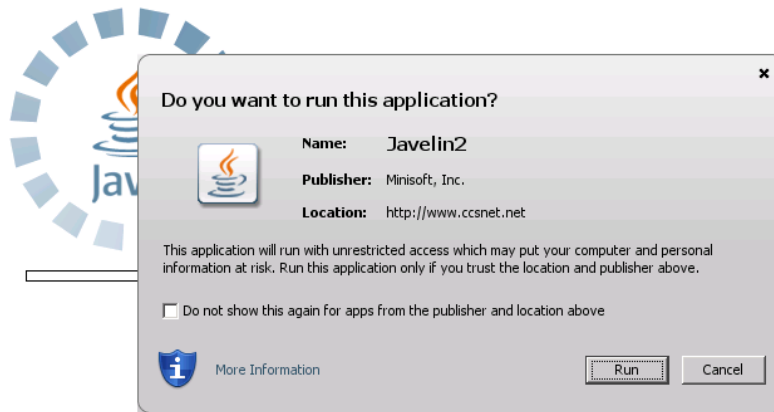

#### BROWSERS

- Internet Explorer (IE10 or above) is still preferred. Note that Microsoft's new browser, Edge, has a similar look in your toolbar. Make sure you click on the IE option.
- Other browsers with JAVA installed may work dependably
- Chrome will not work

#### A NEW LOOK

- Once you open the JeffLINC, it may take a few seconds for the program to load. Then you may see this window:

- Click "Run" to allow the program to open. JeffLINC will automatically open.
- If the JeffLINC window is too small for easy viewing, click the top left button "Make Floating." You can then grab a corner of the screen and increase the size.

Please let us know if you have any problems with the new system.
