Application Engineering Technician

Great opportunity to gain hands-on experience in the transformer industry!

Jefferson Electric, a rapidly growing manufacturer of dry-type electrical transformers, is seeking an **Application Engineering Technician** to join our Sales Engineering Team. The successful candidate will provide technical support to our internal and external customers regarding Jefferson's dry-type transformer product lines.

Primary responsibilities include:

- Handles daily technical phone calls and field support
- Prepares quotations to meet customer requirements
- Act as a liaison between customers, Design Engineers, and manufacturing personnel
- Troubleshooting, entering and tracking customer quotes
- Other tasks and projects as assigned by the Engineering Team.

Qualifications include:

- Associates Degree in Engineering Technology or 1-2 years of applicable work experience
- Demonstrated computer and analytical skills
- Familiarity with electrical products or transformers preferred
- Strong organizational and multi-tasking skills
- Excellent customer and team interaction skills

We offer a competitive salary and benefits package and the opportunity to work for a respected industry leader. Interested candidates should send their resumé along with salary requirements to careers@jeffersonelectric.com.
